The Fraunhofer Center for Energy Innovations is accepting applications for the Rauschert scholarship. This scholarship is sponsored by Dr. Richard Metzler, managing director of Rauschert and is inviting students from UConn’s School of Engineering to submit their application.

To be eligible for the scholarship, candidates must meet the following criteria:

- Be an incoming or continuing graduate or undergraduate student enrolled full-time in the School of Engineering;
- Demonstrate academic achievement;
- Be majoring in engineering;
- Demonstrate an interest studying water filtration systems.

The scholarship will be awarded students up to an award amount of $3,000 per recipient. The scholarship may be renewed annually.

Rauschert is offering second opportunity for a student within the School of Engineering to work within the Fraunhofer Center for Energy Innovation located at UConn’s Depot campus. This student will gain hands-on experience in water filtration, collect data and conduct analysis of a waste water filtration processing.

Please submit resume and cover letter to terry@engr.uconn.edu or mail to:
